Tool: Nbot

Names	Nbot TFC
Category	Malware
Type	DDoS
Description	The first family examined was NBOT, a simple denial of service bot which was active from around 2010 to 2012. The malware includes modules to perform flooding of a specified URL with packages of different protocols, such as plain TCP, HTTP GET or POST with different configurations. Besides that, not much functionality can be found in NBOT binaries.
