## Tool: Ficker Stealer

Names	Ficker Stealer
Category	<a href="#">Malware</a>
Type	<a href="#">Info stealer</a> , <a href="#">Credential stealer</a>
Description	( <a href="#">Minerva</a> ) FickerStealer is a MaaS (Malware as a Service) stealer that is sold on hacking forums. Its main goal is to steal sensitive information cached by the user - specifically browser passwords - and send it back to the virus' owner. In Minerva's lab environment we even saw Ficker downloading <a href="#">Kronos</a> RAT, making this threat more dangerous than it initially seems.
