Tool: CobInt

Names	CobInt COOLPANTS
Category	Malware
Type	Downloader
Description	(Proofpoint) CobInt is a downloader malware written in C. Its name is based on the association of the malware with the “Cobalt Group” threat actor and an internal DLL name of “int.dll” used in some of the samples. The malware can be broken up into three stages: an initial downloader that downloads the main component, the main component itself, and various additional modules.
