The image shows a ransom note with a white background and a dashed red border. The text is centered and reads: "UNTIL FILES" in black, "3D11H30M15S" in white on a red rectangular background, and "PUBLICATION" in black. Below this, it says "Deadline: 20 Oct, 2022 23:34:45 UTC" in red. At the bottom left is a small photo of an Oomiya store. To the right of the photo is the text "oomiya.co.jp" and a Japanese paragraph: "大宮化成株式会社 大宮化成は、変化する時代のニーズに応え、産業の発展に貢献します。大宮化成の事業は、大きく四つの分野に分かれます。" Below that is the red text "ALL AVAILABLE DATA WILL BE PUBLISHED !".

## The IT infrastructure of the Japanese tech company Oomiya was infected with the LockBit 3.0 ransomware.

One of the affiliates for the LockBit 3.0 RaaS hit the Japanese tech company Oomiya. Oomiya is focused on designing and manufacturing microelectronics and facility system equipment.

The business of Oomiya Kasei is divided into four major areas, manufacturing and designing chemical and industrial products, designing electronic materials, pharmaceutical development, and factory manufacturing.

**UNTIL FILES**  
**3D11H30M15S**  
**PUBLICATION**

Deadline: 20 Oct, 2022 23:34:45 UTC

**oomiya.co.jp**  
大宮化成株式会社 大宮化成は、変化する時代のニーズに応え、産業の発展に貢献します。大宮化成の事業は、大きく四つの分野に分かれます。

**ALL AVAILABLE DATA WILL BE PUBLISHED !**

Lockbit 3.0 operators claim to have stolen data from the company and threaten to leak it by October 20, 2022 if the company will not pay the ransom. At this time, the ransomware gang has yet to publish samples of the alleged stolen documents.

This incident could have a significant impact of third party organizations because Oomiya is in the supply chain of major organizations worldwide in multiple industries, including manufacturing, semiconductors, automotive, communications, and healthcare.

The Lockbit affiliates are the most active in this period, bolows data shared by DarkFeed that demonstrates the malware has hit hundreds of organizations.
