Tool: Amavaldo

Names	Amavaldo
Category	Malware
Type	Banking trojan , Backdoor , Keylogger , Info stealer , Credential stealer
Description	(ESET) Most Latin American banking trojans we have analyzed connect to the C&C server and stay connected, waiting for whatever commands the server sends. After receiving a command, they execute it and wait for the next one. The commands are probably pushed manually by the attacker. You can think of this approach as a chat room where all the members react to what the admin writes.
