release [v1.25](#) license [BSD3](#) go report [A +](#)

Muraena is an almost-transparent reverse proxy aimed at automating phishing and post-phishing activities.

The tool re-implements the 15-years old idea of using a custom reverse proxy to dynamically interact with the origin to be targeted, rather than maintaining and serving static pages.

Documentation

That the project is documented at <https://muraena.phishing.click>

Contributing

1. Fork it!
2. Create your feature branch: `git checkout -b my-new-feature`
3. Commit your changes: `git commit -am 'Add some feature'`
4. Push to the branch: `git push origin my-new-feature`
5. Submit a pull request 😊

See the list of [contributors](#) who participated in this project.

License

Muraena is made with ❤️ by [the dev team](#) and it's released under the `license` `BSD3`.
