Description	<a href="#">(Cofense)</a> It's called the Vengeance Justice Worm (Vjw0rm), but think of it as the Leatherman tool of malware. Vjw0rm wreaks havoc in highly versatile ways: information theft, denial of service (DoS) attacks, and self-propagation to name a few. Cofense™ has spotted this hybrid threat—a cross between a worm and a remote access trojan (RAT)—in a recent phishing campaign dangling a banking lure.
