

# "aa" distribution Qakbot (Qbot) infection with DarkVNC traffic

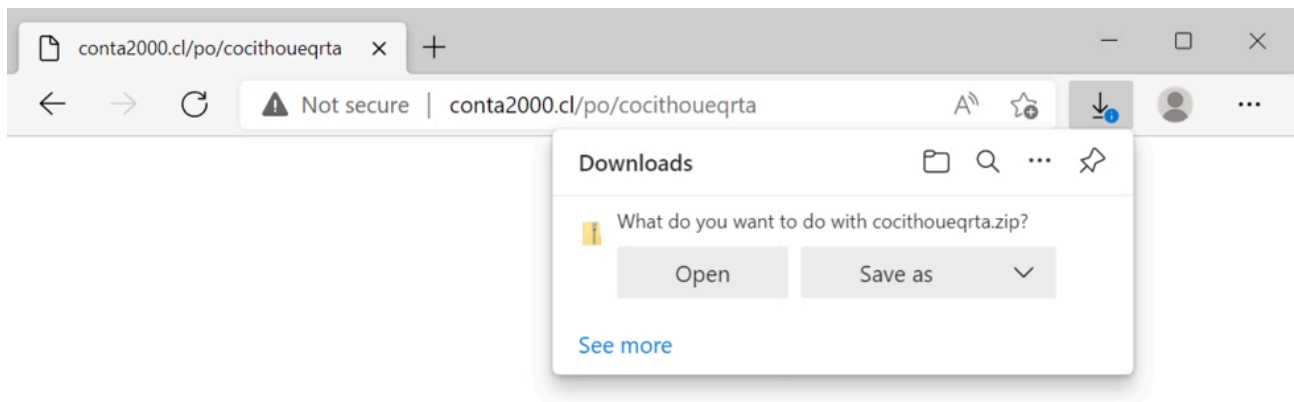

By SANS Internet Storm Center

Archived: 2026-04-05 13:21:48 UTC

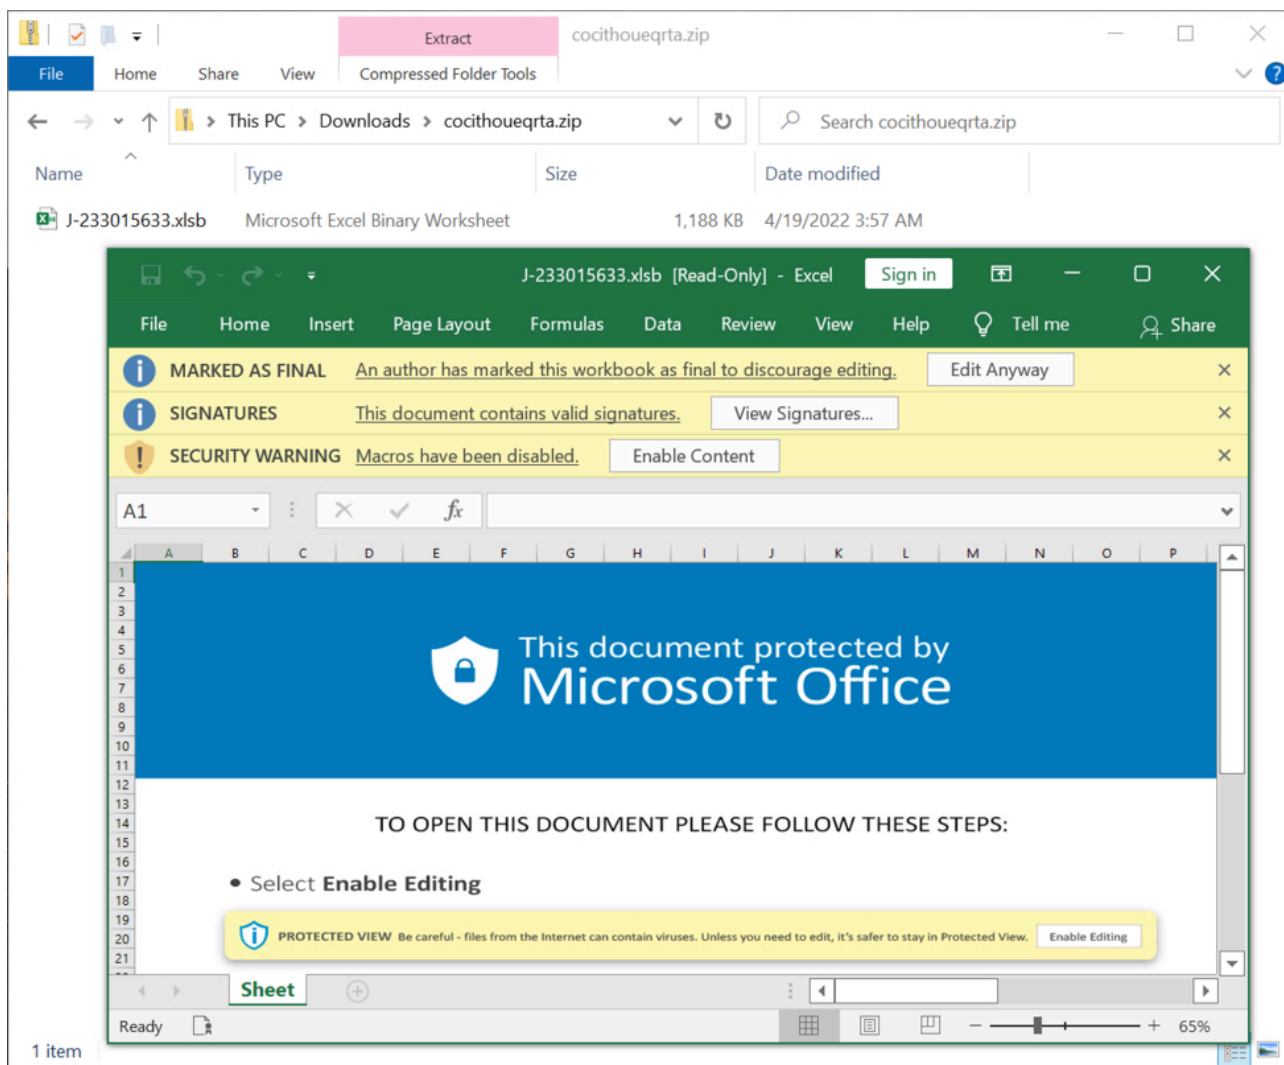

## Chain of Events

Email --> link --> downloaded zip archive --> extracted Excel file --> enable macros --> HTTPS traffic for Qakbot DLL files --> Qakbot C2 activity --> DarkVNC traffic

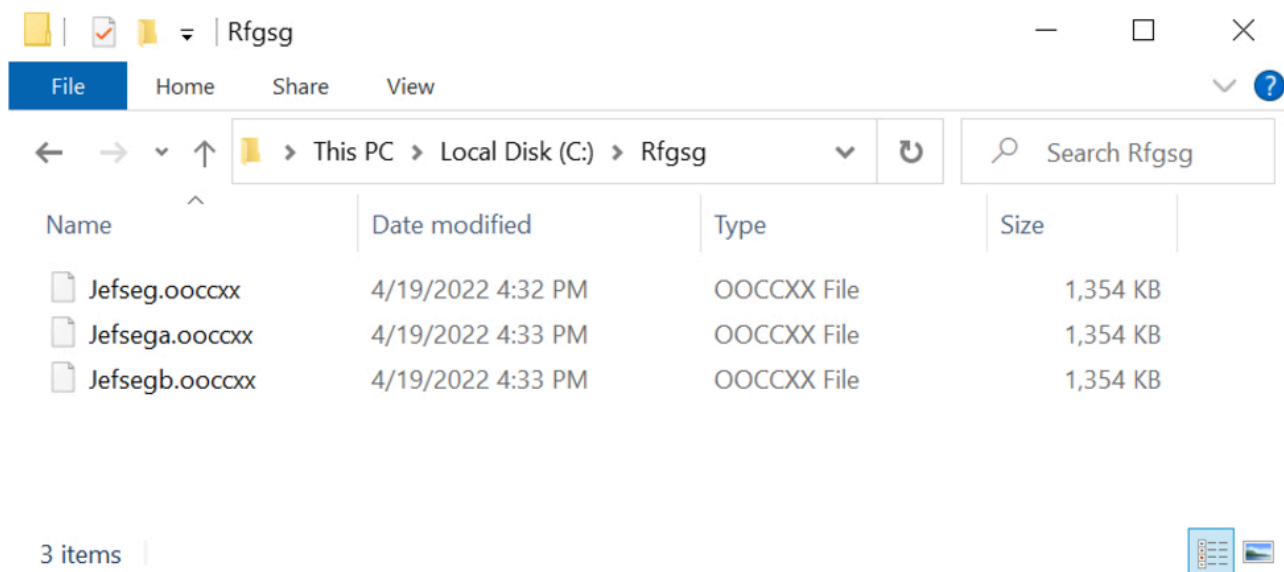

## Images

Shown above: Link from an email distributing Qakbot ("aa" distribution tag) in a web browser.

Shown above: Downloaded zip archive and extracted spreadsheet.

Shown above: Qakbot DLL files saved to an infected Windows host.

### ***Final words***

A packet capture (pcap) of the infection traffic and the associated malware samples are available [here](#). The pcap is from an Active Directory (AD) environment. The pcap been sanitized to disguise usernames, hostnames, domains, internal IP addresses, the public IP address used to connect from my test lab to the Internet, and any other information that could identify the environment.
