## Tool: JadeRAT

Names	JadeRAT
Category	<a href="#">Malware</a>
Type	<a href="#">Backdoor</a> , <a href="#">Info stealer</a> , <a href="#">Exfiltration</a>
Description	<p>(<a href="#">Lookout</a>) Lookout researchers are monitoring the evolution of an Android surveillanceware family known as JadeRAT, we believe may be connected to a government sponsored APT group.</p> <p>JadeRAT supports over 60 commands that can be issued in the format !&lt;command_id&gt;&amp;&lt;optional_cmd_params&gt;@. Many of these offer standard information gathering functionality seen in typical mobile surveillanceware, however JadeRAT supports several less common capabilities. These include notifying an operator via SMS when a device has booted and silently dropping calls and texts to attacker specified numbers.</p>
