Tool: Viper

Names	Viper
Category	Tools
Type	Vulnerability scanner
Description	<p>(Cluster25) Viper is a graphical penetration tool, which modularizes and weaponizes the tactics and technologies commonly used in the process of Intranet penetration. As stated in its Github page, Viper integrates 80+ modules, covering almost all the known Techniques (such as Resource Development, Initial Access, Execution, Persistence and so on).</p> <p>Like Cobalt Strike, Viper allows easy payload generation, such as Meterpreter, ReverseShell and other custom beacons.</p>
