

Data from Information Repositories: Confluence, Sub-technique T1213.001 - Enterprise

Archived: 2026-04-05 12:57:04 UTC

Adversaries may leverage Confluence repositories to mine valuable information. Often found in development environments alongside Atlassian JIRA, Confluence is generally used to store development-related documentation, however, in general may contain more diverse categories of useful information, such as:

- Policies, procedures, and standards
- Physical / logical network diagrams
- System architecture diagrams
- Technical system documentation
- Testing / development credentials (i.e., [Unsecured Credentials](#))
- Work / project schedules
- Source code snippets
- Links to network shares and other internal resources
