

# Remote Desktop & Virtual Terminal

Archived: 2026-04-05 13:26:17 UTC

## Command and Control

**FleetDeck is a new Remote Desktop & Virtual Terminal solution, tailored for techs to securely manage large fleets of computers.**

## Security Through Simplicity

### No eavesdropping

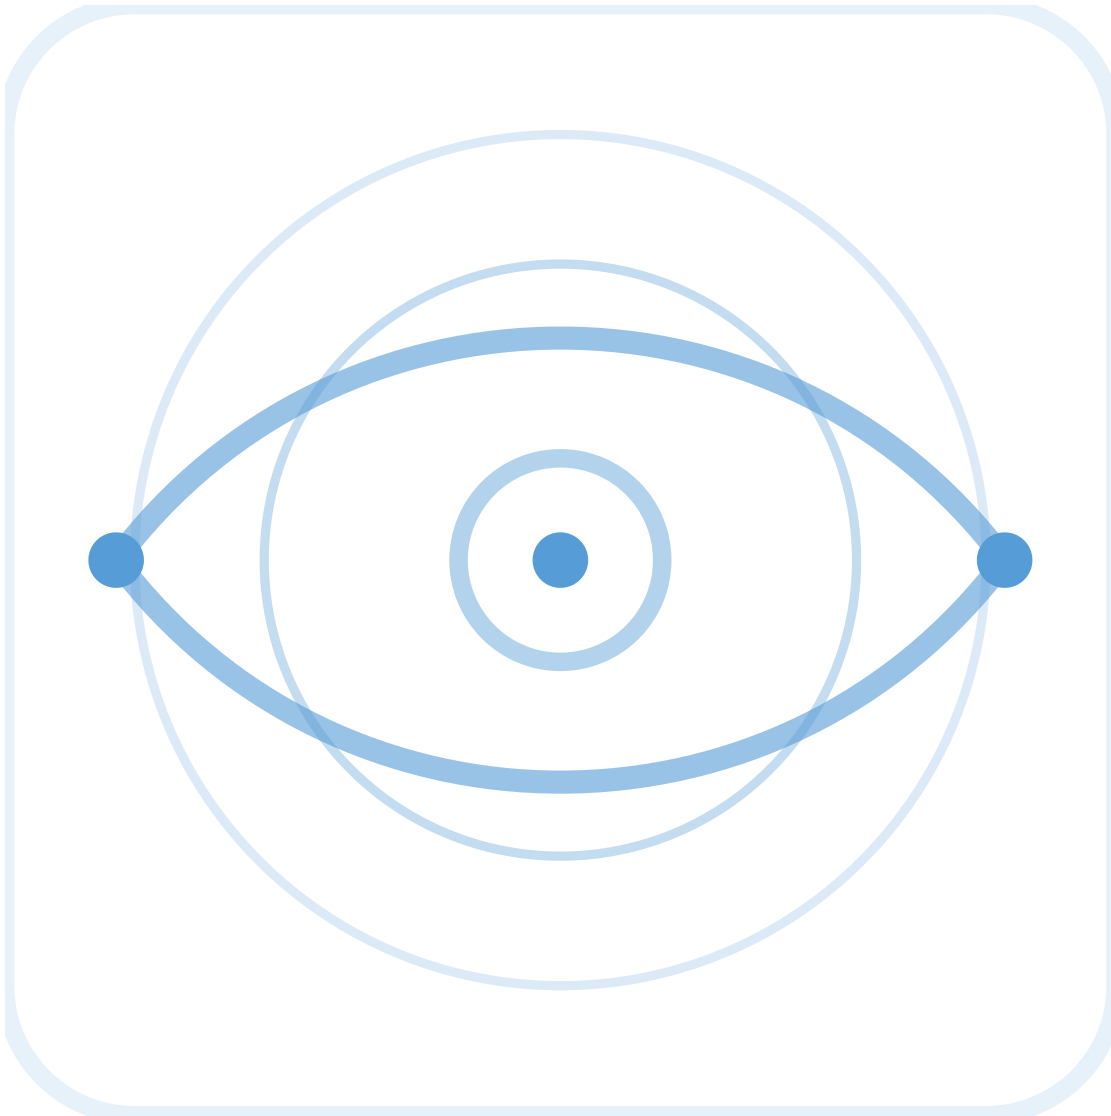

True end-to-end encryption with ephemeral private keys that never leave your devices.

### Strong authentication

Two-factor support for all authentication apps.

### Advanced auditing

Get alerts for suspicious activity on your account in real-time.

## **New Technology**

### **Tailored for tech support**

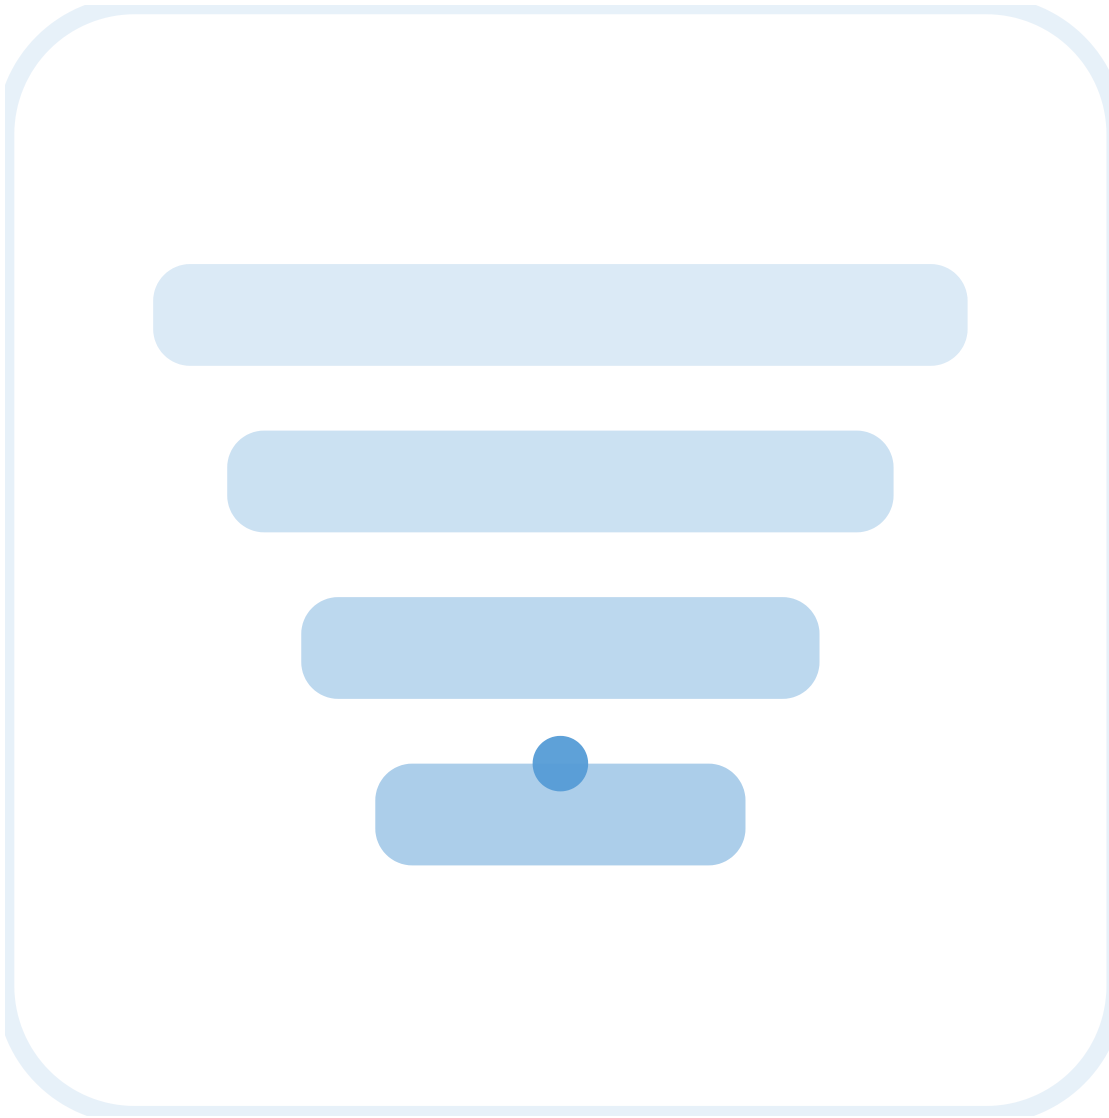

Video codec and netcode purpose built for Remote Desktop.

### **Get in and out quick**

High frame rate and interactivity prioritized over image quality.

### **Robust video streaming**

Handles high latency and low bandwidth conditions better than competing solutions.

## **RMM**

### **Run a tight ship**

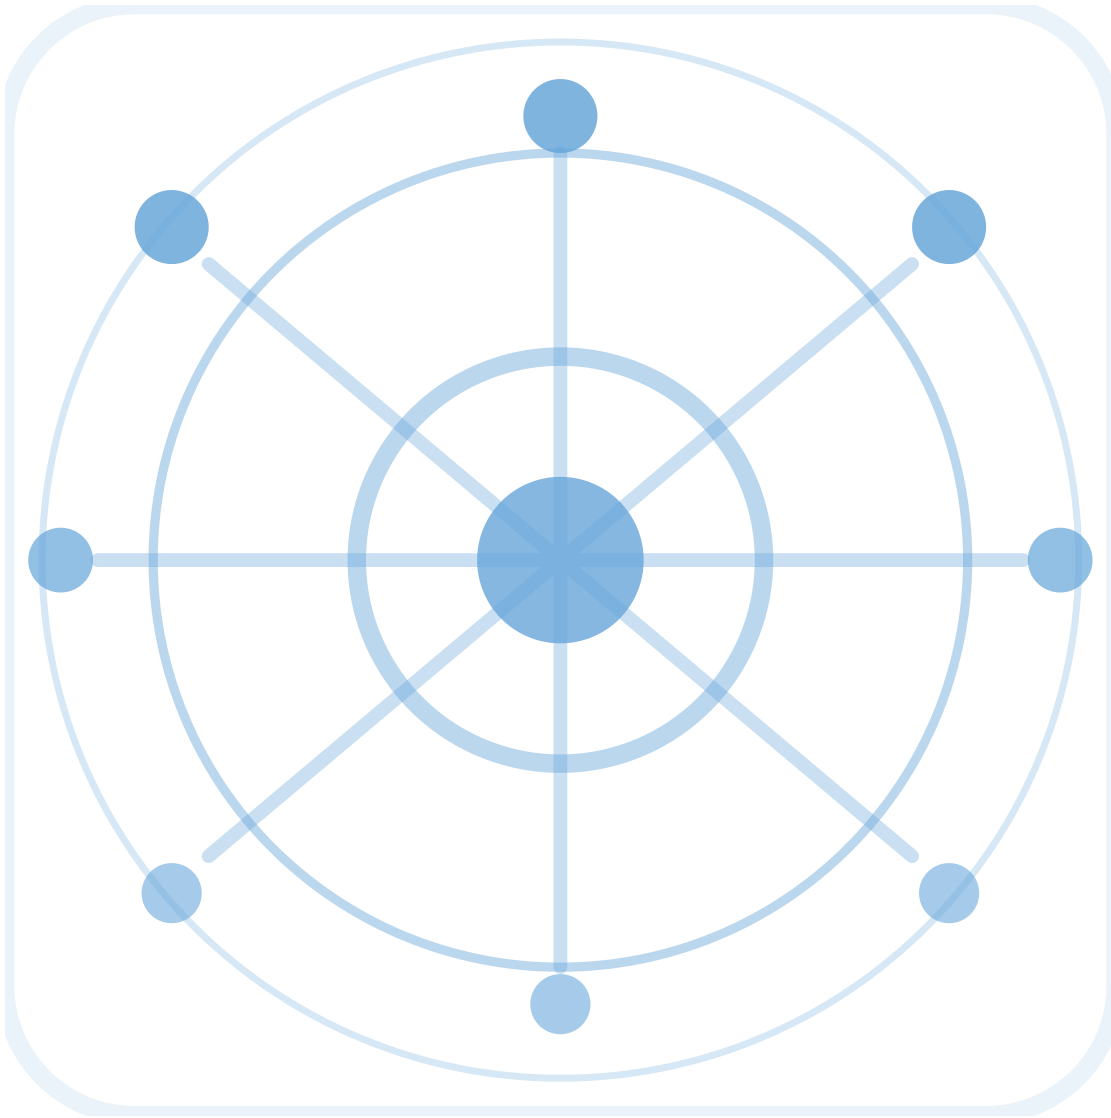

Organize large fleets of computers in folder hierarchies.

### **Operate unattended**

Perform background tasks with virtual terminal access.

### **Know your inventory**

Monitor system information from computers as soon as they are deployed.
