

## Quick look at another Alina fork: XBOT-POS

Archived: 2026-04-05 20:57:54 UTC

Edit: In fact after looking at the sample it's a pure copy pasta of Tiny Nuke :) -  
cd025523e3aec57f809552b9d1adc4b89526cc632f6d4c481aa2c8c3501dda6b

Hi, it's time for a new post. Today I'll try to have a look at the "Team NZMR"  
I've found this funny team by hazard on Twitter via the bot [@ScumBots](#)

I would like to write this little blog post because I think that this is interesting to see an Alina panel behind a .onion domain and as you can see later, I like look at some weird panels :D.

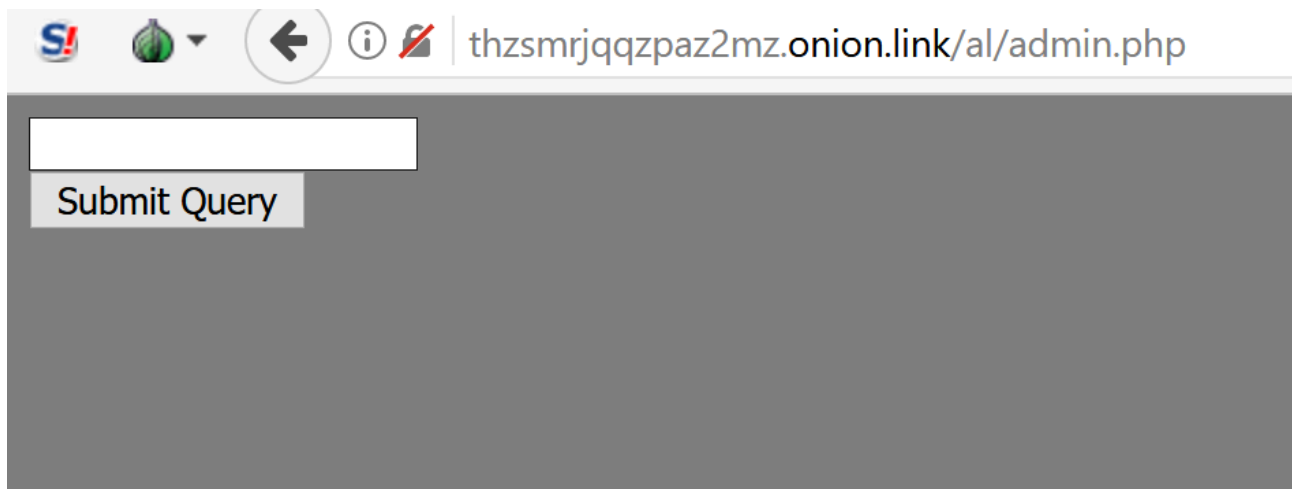

Let's have a look on this server.

As we know, we have an Alina ([Well known POS malware](#)) panel at

thzsmrjqzpz2mz.onion.link/al/loading.php .

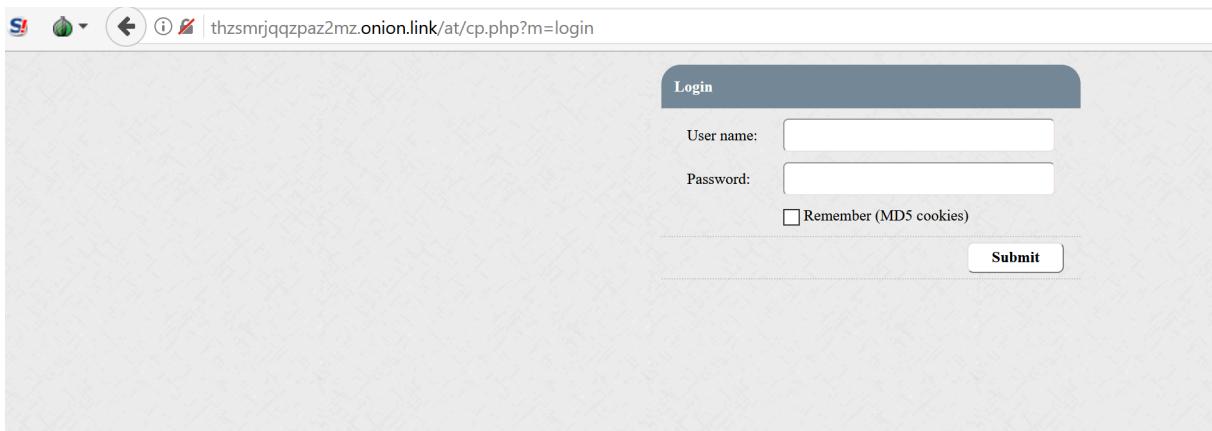

Samples: 26aa9709d0402157d9d36e4849b1f9bacecd8875169c7f26d7d40c5c0c3de298

(http://thzsmrjqzpz2mz.onion.link/al/Spark.exe)

In the same boring way, we can found:

- a Fareit/Pony panel at <https://thzsmrjqzpz2mz.onion.link/pn/admin.php> (I don't have sample)
- an [Atmos](#) at <https://thzsmrjqzpz2mz.onion.link/at/cp.php> :  
Sample e34720cc8ab3718413064f19af5cc704e95661e743293a19f218d3b675147525  
(<https://thzsmrjqzpz2mz.onion.link/at/files/us.exe>)

Thanks to [CCAM](#) we can get 2 new servers used by this team:

- <http://netco1000.ddns.net/at/file.php>
- <http://22klzn6kzjwlmt2.onion.link/at/file.php>

Those guys really want your creds and your credit card numbers :D

They also try to deal with ransomware ([NZMR Ransomware](#)) at <https://thzsmrjqzpz2mz.onion.link/ed2/> without success...

## Bitcoin Address

Addresses are identifiers which you use to send bitcoins to a

Summary		Transactions	
Address	<a href="#">1Dh6zY9U1V3XJELDh8hQdox3eR765XyR4H</a>	No. Transactions	0
Hash 160	<a href="#">8b372656bc83a0238ac5abbec5e3e22da68ae338</a>	Total Received	0 BTC
Tools	<a href="#">Related Tags - Unspent Outputs</a>	Final Balance	0 BTC

[Request Payment](#) [Donation Button](#)

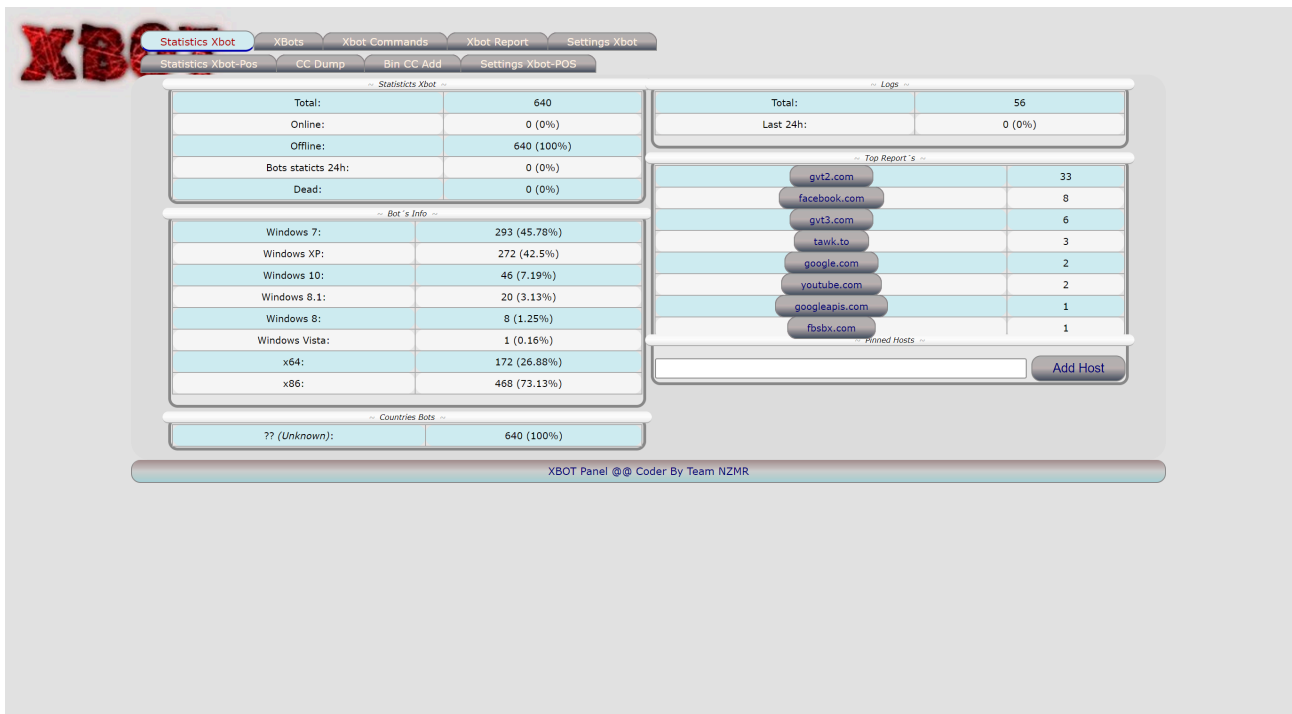

### Transactions (Oldest First)

No transactions found for this address, it has probably not been used on the network yet.

But I've write this quick blog post for the last panel,

Let me introduce you XBOT panel \o/: <https://thzsmrjqzpz2mz.onion.link/panel/>

(click to enlarge)

The bot ad:

Selling xbot ,new bank trojan -- Modules -- Webinject -- Formgrabber -- Socket4/5 -- Hidden VNC

New bot bank xbot is available for rent (800\$/monthly) -- server on tornetwork/clearnet

Customized programming service and web developer/c/c++/Python/NET/others

Team Coder/NZMR

xbot costs 3k \$ modules available >webinject -- formgrabber -- Socket4/5 -- Hidden VNC

When buying xbot what do you get?

You will get the builder,bin/exe+socket.exe/server.exe hvnc

[+] - Free installation on your server in tornetwork or clearnet, you choose

[+] - monthly support paid 100 \$ (you choose,with or without support)

[+] - Update bot for new version 400 \$

[+] Rent xbot

Panel access (Clearnet/Tornetwork)

Bin (exe)

Socket.exe/hvnc.exe

Price

800 \$ monthly (First 6 customers, others 1k \$)

Support monthly 100 \$ (btc)

I don't have any sample yet but if you have one, i'm REALLY interested :D.

Thanks to Xylitol this panel looks like a mix between Alina and Dexter. For example the URI scheme

"/front/stats.php", the successtatuscode 666 or this page "Version Control":

Overall: 59 XBot-Pos (0 online, 2 online in last 12 hours)

on: 0  
last 12 hrs: 2  
overall: 59

### Version Control

Version	Count	Delete
Mozilla/4.0 (com)	3	<input type="checkbox"/>
Mozilla/5.0 (com)	56	<input type="checkbox"/>

This panel looks designed for Banking stuff (webinjects) and POS malware.

From XBOT panel you can DL/Exec, Start VNC sessions, socks sessions and update bots:

Statistics Xbot | XBots | **Xbot Commands** | Xbot Report | Settings Xbot

Statistics Xbot-Pos | CC Dump | Bin CC Add | Settings Xbot-POS

~ Create ~

Type: **Download & Execute**

Execution Limit: **Download & Execute**

Country Codes: **Start VNC**

UHIDs: **Start Socks**

Parameter: **Update**

XBOT Panel @@ Coder By Team NZMR

Some settings (look at the Alinas 666 status code):

The screenshot shows the 'Settings Xbot' panel in the XBOT interface. It features a navigation bar with tabs for 'Statistics Xbot', 'XBots', 'Xbot Commands', 'Xbot Report', and 'Settings Xbot'. The 'Settings Xbot' tab is active, displaying several configuration sections:

- Update Timeouts (Seconds):** Offline: 1000, Dead: 2592000. Includes an 'Update' button.
- Update Database Credentials:** Host: 127.0.0.1, Name: panel, User: panel, Password: [empty]. Includes an 'Update' button.
- Update Server Addresses:** VNC: 127.0.0.1:6666, SOCKS: 127.0.0.1:6667. Includes an 'Update' button.
- Update Panel Credentials:** User: admin, Password: [empty], Password Verification: [empty]. Includes an 'Update' button.
- Upload WebInjects:** File: [empty], WebInjects button.
- Upload Binaries:** x64: [empty], x86: [empty], Upload button.

Footer: XBOT Panel @@ Coder By Team NZMR

You can also add some bins in the panel database. Currently, they have 8472 Bins in the database. And finally the bot lists (~600 bots if I trust the bots list).

The screenshot shows the XBOT Panel interface. At the top, there are navigation tabs: Statistics Xbot, XBots, Xbot Commands, Xbot Report, Settings Xbot, Statistics Xbot-Pos, CC Dump, Bin CC Add, and Settings Xbot-POS. Below these is a search section with fields for Country Codes, UHIDs, and IPs, and a Submit button. The main area displays a table of bot results, ordered by Last Seen in descending order. Each row contains a UHID, IP, Country (mostly Unknown), OS, Computer name, Username, Last Seen time, and First Seen time. A Command button is present for each bot entry.

Navigation buttons: First, Previous, 1 / 13, Next, Last. Footer: XBOT Panel @ Coders By Team NZMR

I've uploaded the whole list of bots on [this album](#). Ping me if you're on the list :D I'm really curious to see the binary part

And finally the database structure reminds again Alina:

By this way we will find soon more Alina forks than Zeus forks \o/

So, NOPE! it's not a super new next gen POS malware, it's just another Alina Fork :D but this webinjects part looks curious :) and the team seems very active.

But come one, 3k\$ for open sourced malware haha...

Thanks for your time, thanks to Xylitol and happy hunting :)
