Acknowledgments

(These are the people who did the hard stuff)

This project was originally inspired by:

- [CredCrack](#)
- [smbexec](#)
- [smbmap](#)

Unintentional contributors:

- The [Empire](#) project
- @T-S-A's [smbspider](#) script
- @ConsciousHacker's partial Python port of Invoke-obfuscation from the [GreatSCT](#) project

Documentation, Tutorials, Examples

See the project's [wiki](#) for documentation and usage examples

Installation

Please see the installation instructions on the [official wiki](#)

Code Contributors

Awesome code contributors of CME:

To do

- ~~Own everything~~
