

# Why Your EDR Let Pikabot Jump Through

Archived: 2026-04-05 22:40:08 UTC

*Tyler Fornes, Principal Security Solutions Architect*

★★★★★

Expel, Global Leader in MDR

We had to

wait hours or even days

for L2 or L3 teams to investigate such an attack but

with VMRay.

I can have that done in less than 15 minutes.

*Vice President, Cyber Security Labs*

★★★★★

Global Top 3 Cyber Security IR Services Provider

VMRay is our

deep sandbox

analysis solution that has helped us reduce the workload of our manual analyses by 90%, from 1000s to 100s per day.

*Team Lead, Cyber Security*

★★★★★

A Leading Global Tech Company

Manual analysis

of a huge number of submissions was time-consuming. With VMRay, we are able to handle this with ease in an automated way. This creates enormous value for us.

*Robert / Senior Expert, Cyber Defense*

★★★★★

Major Telecom Company

VMRay provided the

fully automated detection capabilities

that were crucial to speed up our incident response process and shorten investigation.

*Lead Security Analyst*

★★★★★

Gartner Peer insights

VMRay has enabled me to

decrease the manual analysis frequency and time

significantly and increase positive identification of malware samples.

*Threat Intelligence Team*

★★★★★

A Global Top 10 Technology Brand

VMRay's

data quality and rich API

allowed us to automate our reverse engineering and data extraction tasks in a way no other vendor was able to provide.

*Threat Research Team*

★★★★★

Carbon Black

What our team loves about VMRay is the ability to

quickly triage a lot of malicious samples

by providing a wide variety of targets, configurations & applications out of the box.
