

Arbor DDoS Protection Solution - Defend Against DDoS Attacks | NETSCOUT

Archived: 2026-04-05 20:24:52 UTC

Arbor DDoS Detection & Defense

For more than 25 years, Arbor DDoS products have been trusted to protect the availability of the global internet. With visibility into 800Tbps of traffic across 550+ customers, totaling up to 50% of the world's internet traffic, Arbor DDoS assures the availability of the most important services in the connected world.

Problems We Solve

Comprehensive network visibility is the fundamental tenet for DDoS attack protection.

Automatically detect dynamic, multi-vector DDoS attacks.

Intelligently and automatically orchestrate multiple methods of mitigation employing transparent AI for optimal protection.

Proven and Trusted DDoS Detection & Defense Since 2000

Today's DDoS attacks are dynamic, use multiple vectors, and leverage evolving AI techniques to evade your current DDoS defenses. Despite requiring low levels of effort from attackers, these attacks can have catastrophic consequences to your services, reputation, and revenue.

With an added layer of transparent, AI automated protection backed by the world's best threat intelligence and more than 25 years of DDoS experience, NETSCOUT Arbor Adaptive DDoS Protection is a purpose-built, pure play solution designed to protect the availability of your mission-critical services, maintain compliance, and grow revenue. Pairing local network visibility with unmatched global intelligence delivers comprehensive protection against all types of DDoS attacks.

Hunan Mobile

Are You Experiencing a DDoS Attack?

Your business is riding on the availability and integrity of your website and online services. A Distributed Denial of Service (DDoS) attack could wreak financial havoc, compromise your customers and damage your reputation.

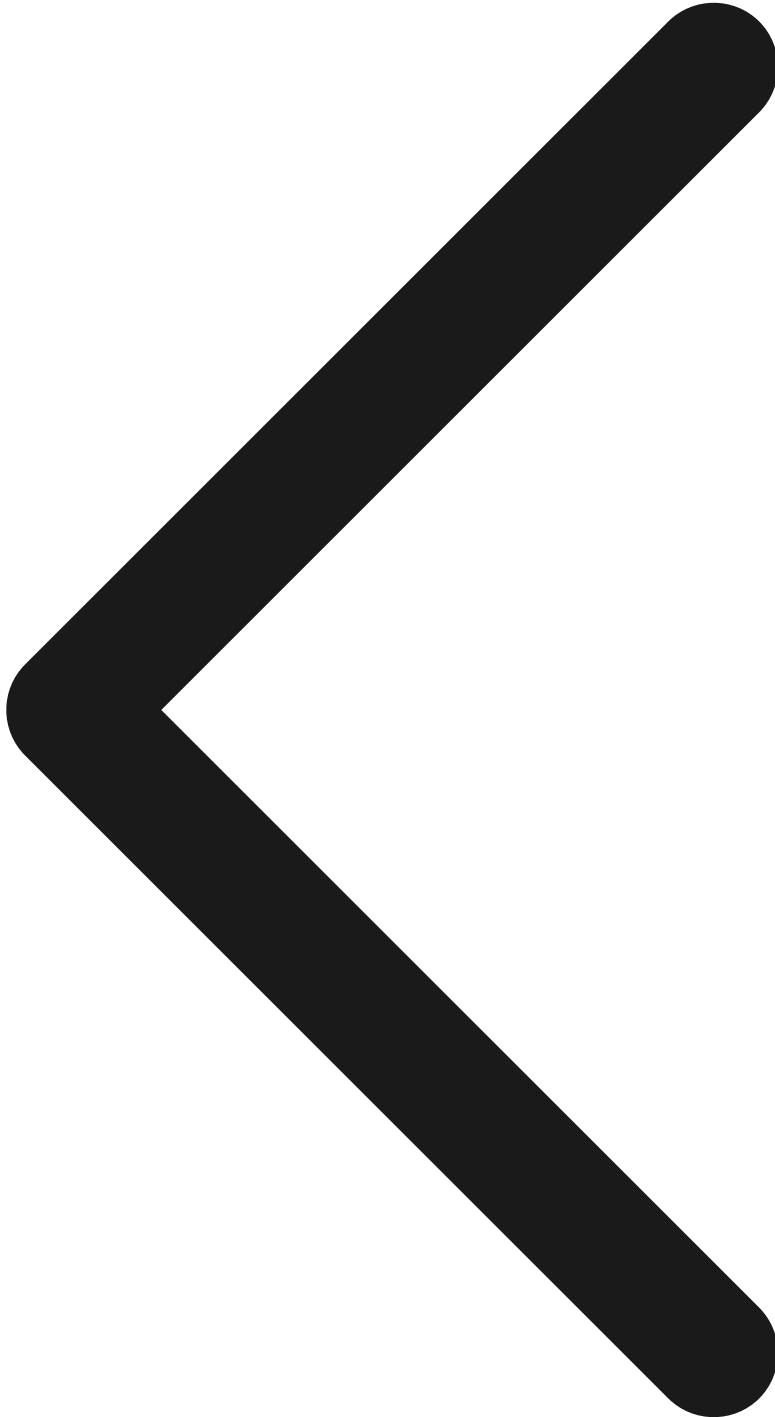

If you're under attack, Please call us. We can help.

- International [+1 734 794 5099](#)
- Toll Free (North America) [844-END-DDoS](#)
- Our global and local numbers [can be found here.](#)

Our DDoS Mitigation Tools are proven in the world's most demanding networks. We can provide rapid deployment and pricing flexibility through a mix of managed services, in-cloud, on-premise and virtualized solutions.

Products

DDoS Detection & Defense for Enterprise & Service Provider Networks

Arbor Edge Defense (AED)

Arbor Edge Defense (AED) is an inline security appliance deployed at the network perimeter, between the internet router and firewall. This AI and ML-powered solution provides stateless, on-premise DDoS protection.

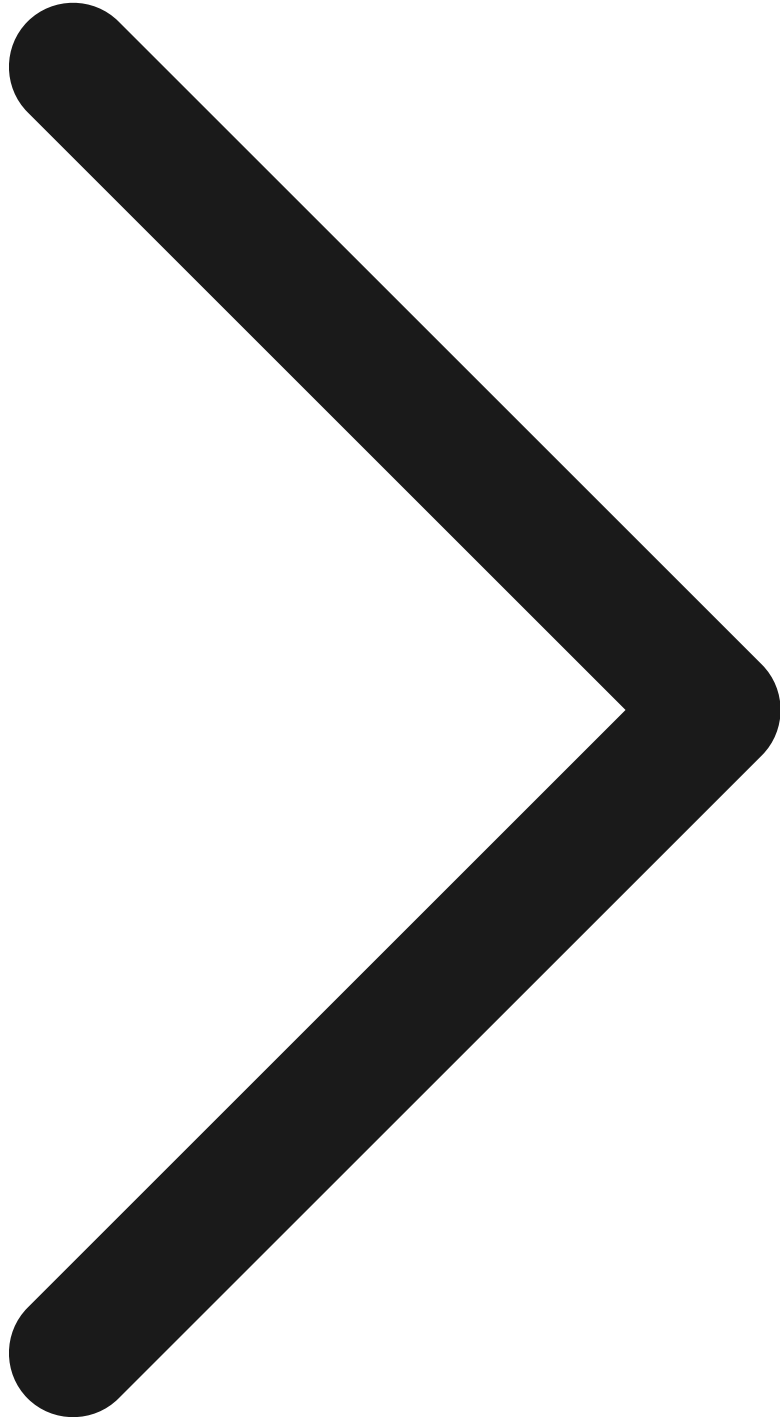

Arbor Sightline DDoS Attack Detection Solution

Whether you are a service provider or have a complex enterprise network, Arbor Sightline helps monitor and identify networking and security issues at any network scale with AI and ML-powered insights.

Arbor Insight Network Traffic Engineering & Analytics

Arbor Insight provides powerful network traffic engineering and analytics to improve workflows in Arbor Sightline.
