## Tool: Revealer Keylogger

Names	Revealer Keylogger
Category	<a href="#">Tools</a>
Type	<a href="#">Keylogger</a>
Description	<p>(<a href="#">Softonic</a>) Revealer Keylogger is a simple, easy-to-use keylogger that records everything that's typed into the computer.</p> <p>Revealer Keylogger works surprisingly well. Under a rather simple interface we find a tool that can hide itself (so that users don't notice they're being logged) and record absolutely everything that you type, from a simple text document to the user-names and passwords (without asterisks) entered on any website.</p>
