## APT group: LockBit Gang

Names	LockBit Gang (?) Bitwise Spider ( <i>CrowdStrike</i> )	
Country	[Unknown]	
Motivation	<a href="#">Financial gain</a>	
First seen	2019	
Description	<p>(<a href="#">Bleeping Computer</a>) LockBit ransomware takes as little as five minutes to deploy the encryption routine on target systems once it lands on the victim network.</p> <p>Joining the ransomware-as-a-service (RaaS) business in September 2019, LockBit is atypical in that it's driven by automated processes for quick spreading across the victim network, identifying valuable systems and locking them up.</p> <p>LockBit attacks leave few traces for forensic analysis as the malware loads into the system memory, with logs and supporting files removed upon execution.</p>
