**The trends in today's communication technology are based on a few facts:**

**Mobility of user**

**Based on IP data**

**Services & usage**

**(VoIP, messenger, social media)**

**Higher security standards  
(Built-in encryption, reduced security flaws)**

**Target Profiling**

FinFisher™'s Profiling Solution sets the basis for every investigation by creating a comprehensive target profile.

**Data Crawling**

FinFisher™'s Crawler Solution for social networks like facebook, Twitter etc. goes beyond strong privacy settings.

**Strategic WiFi Interception**

FinFisher™ offers a wide-scale strategic WiFi Interception Solution that is device independent.

**Remote Monitoring & Development Solutions**

FinFisher™'s Remote Monitoring Solution covers the latest PCs, smartphones, tablets and most common operating systems. Deployment Solutions include Over the Air, IMSI and Exploits.

## **Case Management**

FinFisher™'s Case Management Solution is a comprehensive, future oriented support system for decision-making activities, generating customized reports.

## **IT Intrusion Training & Certification**

FinFisher™'s Training Academy offers certified customized trainings and qualified support, thus setting the basis for every successful investigation.

## **COMPLIANCE**

All our activities comply with the respective laws and export regulations. International and domestic government bodies determine our day to day operations.

## **RESPECT FOR PRIVACY**

We do not sell mass interception technology; our products can only be used for targeted and lawful criminal investigation.

## **EXCELLENCE IN CUSTOMER SERVICE**

We provide tailor-made end-to-end solutions that focus on achieving operational results, supported by specialist training and professional after-sale services.

## **CUSTOMER CONFIDENTIALITY**

We sell our solutions exclusively to government law enforcement and intelligence agencies and value the high degree of trust in our customer relationships. To protect ongoing and future investigations, we do not disclose any customer details and keep public product information to a minimum exposure

## **VISION**

To be the number one partner of law enforcement and intelligence agencies.

## **MISSION**

We develop and sell cutting-edge IT Investigation solutions that close the gap in traditional investigative methods and enable our customers to execute targeted investigations with the aim of identifying and convicting serious criminals.
