## BloodHound Legacy Edition (v4) Has Been Deprecated

This repository is for BloodHound Legacy (version 4), which was last updated in 2023 and is no longer maintained. It will be archived in the near future.

## Please Use the New BloodHound Community Edition

BloodHound Legacy has been replaced by the free BloodHound Community Edition:

- [BloodHound Community Edition GitHub repository](#)
- [Installation instructions](#)
- [Full documentation](#)

BloodHound was created by [@\\_wald0](#), [@CptJesus](#), and [@harmj0y](#).

BloodHound is maintained by the [BloodHound Enterprise](#) team.

## Access to Deprecated Resources

You can still access the deprecated BloodHound Legacy documentation [here](#).

## About BloodHound Enterprise

[BloodHound Enterprise](#) is an Attack Path Management solution that continuously maps and quantifies Active Directory attack paths. It helps eliminate millions—even billions—of attack paths within your existing architecture, removing the attacker's easiest, most reliable, and most attractive techniques.

## License

BloodHound uses graph theory to reveal hidden relationships and attack paths in an Active Directory environment. Copyright (C) 2016–2025 SpecterOps Inc.
