

PortScan

Archived: 2026-04-05 21:51:16 UTC

Find all active devices on your network. Discover the ip address and available services for each network device. Run a speed test to check your internet connection speed. Ping and Traceroute devices. Query WhoIs and DNS server about domain names ip addresses.

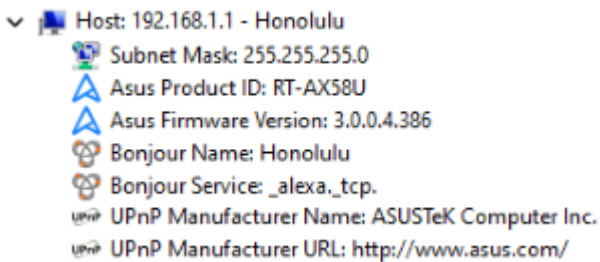

PortScan offers similar and more functionality than the Network Utility on macOS.

[search](#)

Scan Ports

PortScan shows all open ports and additional information like host name, MAC address, HTTP, SMB, FTP, iSCSI, SMTP, SNMP, MySQL and MongoDB services. Up to 100 threads are used for scanning large ip address ranges.

[search](#)

Search Devices

You can search for UPnP enabled devices, Bonjour services, Netgear router, TP-Link Easy Smart switches, Synology NAS devices, Buffalo NAS devices, Asus routers, Miracast devices, Epson projectors, Wiz Lights, Samsung printer, HP printer (SLP / Service Location Protocol), MSA network devices, Sierra Monitor network devices, Freecom network devices and IPv6 devices.

So you can find them even if you don't know the ip address.

- 3 Short Ping's
- Large Ping Suite
- Continuously Pinging

 Ping Status

-  Sent: 44
-  Received: 44 [100%]
-  Average: 22 ms
-  Min: 12 ms
-  Max: 66 ms

[search](#)

Ping Devices

Ping any computer with 3 standard sized ping packets, with 3 different sizes, each 10 times or ping the computer continuously. A graph shows the distribution of response times.

<input checked="" type="checkbox"/>		FAST.com Upload	640.6 kByte/sec
		FAST.com Download	4.7 MByte/sec
<hr/>			
<input checked="" type="checkbox"/>		Apple NetworkQuality Upload	653.7 kByte/sec
		Apple NetworkQuality Download	6.0 MByte/sec

[search](#)

Speed Test

Test your internet connection speed by downloading and uploading data to various servers. Also a latency test is included.

New: UI supports smaller screens
