“I was amazed by how quickly Varonis was able to classify data and uncover potential data exposures during the free assessment. It was truly eye-opening.”

Michael Smith, CISO, HKS

"What I like about Varonis is that they come from a data-centric place. Other products protect the infrastructure, but they do nothing to protect your most precious commodity — your data."

Deborah Haworth, Director of Information Security, Penguin Random House

“Varonis’ support is unprecedented, and their team continues to evolve and improve their products to align with the rapid pace of industry evolution.”

Al Faella, CTO, Prospect Capital
