Tool: NB65

Names	NB65
Category	Malware
Type	Ransomware , Big Game Hunting
Description	(BleepingComputer) More recently, the NB65 hackers have turned to a new tactic — targeting Russian organizations with ransomware attacks since the end of March. What makes this more interesting, is that the hacking group created their ransomware using the leaked source code for the Conti Ransomware operation, which are Russian threat actors who prohibit their members from attacking entities in Russia.
