Tool: DanaBot

Names	DanaBot
Category	Malware
Type	Banking trojan , Keylogger , Credential stealer , Info stealer
Description	(Fortinet) It is a modular banking Trojan that has been historically linked to combining operations with other malware operators, such as those behind Gootkit . Other modules associated with DanaBot include remote desktop through VNC, information stealing, and keylogging. While it appears that this recent attack may be looking to establish a foothold in the network, the reasons behind this are currently unknown.
