AN1751

Application vetting services can look for applications requesting the

`android.permission.BIND_ACCESSIBILITY_SERVICE` permission in a service declaration. On Android, the user can view and manage which applications can use accessibility services through the device settings in Accessibility.

The exact device settings menu locations may vary between operating system versions.

On Android, the user can view and manage which applications have third-party keyboard access through the device settings in System -> Languages & input -> Virtual keyboard. On iOS, the user can view and manage which applications have third-party keyboard access through the device settings in General -> Keyboard.
