## Tool: Karba

Names	Karba Trojan.Win32.Karba.e
Category	<a href="#">Malware</a>
Type	<a href="#">Reconnaissance</a> , <a href="#">Backdoor</a>
Description	<a href="#">(Kaspersky)</a> This malware is 220Kb in size. It was built as MFC framework application with a lot of extra calls that should have complicated the analysis of the sample. It mimics a GUI desktop application but it does not create any visible windows or dialogs to interact with local users. The Trojan collects data about the system and anti-malware software installed on it, and uploads that data to Darkhotel command and control servers.
