Tool: JSSLoader

Names	JSSLoader FOWLGAZE
Category	Malware
Type	Backdoor , Downloader , Exfiltration
Description	(Morphisec) The JSSLoader is a RAT (Remote Access Trojan) with multiple capabilities that were introduced over time. These various capabilities are documented throughout this report. In the specific attack chain that was recently intercepted, the RAT typically executes a DiceLoader which is responsible for the reflective loading and execution of a Cobalt beacon. Not surprisingly, the C2 hosting provider is a company named FranTech Solutions, which has been used before by the FIN7 group.
