## Tool: SmsSpy

Names	SmsSpy
Category	<a href="#">Malware</a>
Type	<a href="#">Backdoor</a> , <a href="#">Downloader</a>
Description	( <a href="#">McAfee</a> ) The malicious code infects Android users using one of two variants depending on the version of OS used by the targeted devices. This ability to download malicious payloads based on OS versions enables the attackers to successfully infect a much broader potential landscape of Android devices.
