Tool: CoreLoader

Names	CoreLoader
Category	Malware
Type	Loader
Description	(Kaspersky) CoreLoader, the last malware we found associated to this set of activity, is a simple shellcode loader which performs anti-analysis and loads additional code from a file named WsmRes.xml. Again, this specific file eluded our attempts to catch it but we suspect it to be, one way or another, related to FoundCore (described in the previous section).
