Tool: Dendroid

Names	Dendroid
Category	Malware
Type	Backdoor , Info stealer , Exfiltration
Description	(Lookout) This week, researchers found Dendroid, a custom “Remote Access Toolkit” (RAT) for Android targeting customers from Western countries, and yes, it breached Google Play. A RAT is a type of malware that is used to remotely control the devices it is installed on. The toolkit is being sold for \$300 to anyone who wants to automate the malware distribution process. The creator promises that the malware can take pictures using the phone's camera, record audio and video, download existing pictures, record calls, send texts, and more.
