Tool: FighterPOS

Names	FighterPOS
Category	Malware
Type	POS malware , Keylogger , Credential stealer
Description	(FireEye) The functionality of FighterPOS is similar to other PoS malware families we've seen in the past. It is capable of collecting credit card track 1, track 2, and CVV codes. The malware also contains a RAM scraping functionality, commonly seen in many PoS malware families. Additionally, its keylogger functionality allows the attacker to log all keystrokes on the infected terminal. The code for the RAM scraping functionality is similar to that found in NewPosThings .
