ThreatMon's latest report

The Amnesia Stealer, first identified in 2017, is a highly sophisticated and customizable information stealer that is commonly available on the underground forums due to its ease of use. It is a significant threat, even for small businesses, as it can steal sensitive data such as browser passwords, credit card numbers, and other sensitive information, posing a serious security risk.

This report provides a detailed analysis of the Amnesia Stealer, including its advanced features like keylogging, screenshots, and the ability to inject additional malware like trojans and cryptocurrency miners.
