

Playcrypt, Software S1162 | MITRE ATT&CK®

Archived: 2026-04-05 12:40:18 UTC

[Playcrypt](#) is a ransomware that has been used by [Play](#) since at least 2022 in attacks against the business, government, critical infrastructure, healthcare, and media sectors in North America, South America, and Europe. [Playcrypt](#) derives its name from adding the .play extension to encrypted files and has overlap with tactics and tools associated with Hive and Nokoyawa ransomware and infrastructure associated with Quantum ransomware.
