What is it?

LiteHTTP is an HTTP bot that is being programmed in C#, on the .NET 2.0 dependency.

Expected Features

Panel

- Custom coded with a sleek yet maneuverable design
- Ability to have more than 1 user
- User privileges
- Action logs for all users

Bot

- Download & execute (with option to inject if native)
- Visit webpage (visible or hidden)
- Startup (with persistence)
- Information about bot (aka. OS, version, installed location, etc.)
- Basic botkiller (nothing fancy)
- Update
- Uninstall
