Tool: ATMDtrack

Names	ATMDtrack
Category	Malware
Type	ATM malware , Backdoor
Description	(Kaspersky) Our investigation into the Dtrack RAT actually began with a different activity. In the late summer of 2018, we discovered ATMDtrack, a piece of banking malware targeting Indian banks. Further analysis showed that the malware was designed to be planted on the victim's ATMs, where it could read and store the data of cards that were inserted into the machines. Naturally, we wanted to know more about that ATM malware, so we used YARA and Kaspersky Attribution Engine to uncover more interesting material: over 180 new malware samples of a spy tool that we now call Dtrack.
