Tool: CROWVIEW

Names	CROWVIEW
Category	Malware
Type	Loader
Description	(Mandiant) BIRDWATCH is often referred to collectively as “ JSSLoader ”; however, multiple variations of BIRDWATCH exist which we track as separate code families. One variant of BIRDWATCH is CROWVIEW, which is also .NET-based, but has enough code differences from prototypical BIRDWATCH that we cluster it separately. Unlike BIRDWATCH, CROWVIEW can house an embedded payload, can self-delete, supports additional arguments and stores a slightly different configuration.
