

Detection of Web Services, Detection Strategy DET0896

Archived: 2026-04-05 16:29:51 UTC

AN2028

Once adversaries leverage the web service as infrastructure (ex: for command and control), it may be possible to look for unique characteristics associated with adversary software, if known.^[1] Much of this activity will take place outside the visibility of the target organization, making detection of this behavior difficult. Detection efforts may be focused on related stages of the adversary lifecycle, such as during Command and Control ([Web Service](#)) or [Exfiltration Over Web Service](#).
