APT group: APT 29, Cozy Bear, The Dukes

Names	<p>APT 29 (<i>Mandiant</i>) Cozy Bear (<i>CrowdStrike</i>) The Dukes (<i>F-Secure</i>) Group 100 (<i>Talos</i>) Yttrium (<i>Microsoft</i>) Iron Hemlock (<i>SecureWorks</i>) Minidionis (<i>Palo Alto</i>) CloudLook (<i>Kaspersky</i>) ATK 7 (<i>Thales</i>) ITG11 (<i>IBM</i>) Grizzly Steppe (<i>US Government</i>) together with Sofacy, APT 28, Fancy Bear, Sednit UNC2452 (<i>FireEye</i>) Dark Halo (<i>Volexity</i>) SolarStorm (<i>Palo Alto</i>) StellarParticle (<i>CrowdStrike</i>) SilverFish (<i>Prodaft</i>) Nobelium (<i>Microsoft</i>) Iron Ritual (<i>SecureWorks</i>) Cloaked Ursa (<i>Palo Alto</i>) BlueBravo (<i>Recorded Future</i>) Midnight Blizzard (<i>Microsoft</i>) UNC3524 (<i>Mandiant</i>) CraneFly (<i>Symantec</i>) TEMP.Monkeys (<i>FireEye</i>) Blue Dev 5 (<i>PWC</i>) NobleBaron (<i>SentinelOne</i>) Solar Phoenix (<i>Palo Alto</i>) Earth Koshchei (<i>Trend Micro</i>) G0016 (<i>MITRE</i>)</p>
Country	 Russia
Sponsor	State-sponsored
Motivation	Information theft and espionage
First seen	2008
Description	<p>(F-Secure) The Dukes are a well-resourced, highly dedicated and organized cyberespionage group that we believe has been Russian Federation since at least 2008 to collect intelligence in support of foreign and security policy decision-making.</p> <p>The Dukes primarily target Western governments and related organizations, such as government ministries and agencies, pc and governmental subcontractors. Their targets have also included the governments of members of the Commonwealth of Independent States, Asian, African, and Middle Eastern governments; organizations associated with Chechen extremism; and Russian speakers involved in the illicit trade of controlled substances and drugs.</p> <p>The Dukes are known to employ a vast arsenal of malware toolsets, which we identify as MiniDuke, CosmicDuke, OnionDuke, CloudDuke, SeaDuke, HammerDuke, PinchDuke, and GeminiDuke. In recent years, the Dukes have engaged in apparently spear-phishing campaigns against hundreds or even thousands of recipients associated with governmental institutions and organizations.</p> <p>These campaigns utilize a smash-and-grab approach involving a fast but noisy break-in followed by the rapid collection and exfiltration of as much data as possible. If the compromised target is discovered to be of value, the Dukes will quickly switch the toolset used to stealthier tactics focused on persistent compromise and long-term intelligence gathering.</p>

	<p>In addition to these large-scale campaigns, the Dukes continuously and concurrently engage in smaller, much more targeted utilizing different toolsets. These targeted campaigns have been going on for at least 7 years. The targets and timing of these to align with the known foreign and security policy interests of the Russian Federation at those times.</p>	
Observed	<p>Sectors: Aerospace, Defense, Education, Embassies, Energy, Financial, Government, Healthcare, Law enforcement, Media, Pharmaceutical, Telecommunications, Transportation, Think Tanks and Imagery.</p> <p>Countries: Australia, Azerbaijan, Belarus, Belgium, Brazil, Bulgaria, Canada, Chechnya, Chile, China, Cyprus, Czech, Den, Georgia, Germany, Hungary, India, Ireland, Israel, Italy, Japan, Kazakhstan, Kyrgyzstan, Latvia, Lebanon, Lithuania, Luxer, Montenegro, Netherlands, New Zealand, Poland, Portugal, Romania, Russia, Singapore, Slovakia, Slovenia, Spain, South K, Thailand, Turkey, Uganda, UAE, UK, Ukraine, USA, Uzbekistan, NATO.</p>	
Tools used	<p>7-Zip, AdFind, ATI-Agent, AtNow, BEATDROP, BloodHound, CEELOADER, CloudDuke, Cobalt Strike, CosmicDuke, C, EnvyScout, FatDuke, FoggyWeb, GeminiDuke, Geppei, GoldFinder, GoldMax, GraphicalNeutrino, GraphicalProton, Ham, MagicWeb, meek, Mimikatz, MiniDuke, OnionDuke, PinchDuke, PolyglotDuke, POSHSPY, PowerDuke, QUIETEXIT, R/, RegDuke, reGeorg, Rubeus, SeaDuke, Sharp-SMBExec, SharpView, Sibot, SoreFang, SUNBURST, SUNSPOT, SUPERN, TrailBlazer, WellMail, WellMess, WINELOADER, Living off the Land.</p>	
Operations performed	Feb 2013	<p>Since the original announcement, we have observed several new attacks using the same exploit (CVE-2013-0502) and other malware. Between these, we've observed a couple of incidents which are so unusual in many ways that analyse them in depth.</p> <p>https://securelist.com/the-miniduke-mystery-pdf-0-day-government-spy-assembler-0x29a-micro-backdoor/</p>
	2013	<p>While the old style Miniduke implants were used to target mostly government victims, the new style Cosmic a somehow different typology of victims. The most unusual is the targeting of individuals that appear to be in and reselling of controlled and illegal substances, such as steroids and hormones. These victims in the NITR observed only in Russia.</p> <p>https://securelist.com/miniduke-is-back-nemesis-gemina-and-the-botgen-studio/64107/</p>
	2013	<p>Operation "Ghost"</p> <p>We call these newly uncovered Dukes campaigns, collectively, Operation Ghost, and describe how the group compromising government targets, including three European Ministries of Foreign Affairs and the Washington European Union country, all without drawing attention to their activities.</p> <p>https://www.welivesecurity.com/wp-content/uploads/2019/10/ESET_Operation_Ghost_Dukes.pdf</p>
	Mar 2014	<p>Operation "Office monkeys"</p> <p>In March 2014, a Washington, D.C.-based private research institute was found to have CozyDuke (Trojan.Cc network). Cozy Bear then started an email campaign attempting to lure victims into clicking on a flash video that would also include malicious executables. By July the group had compromised government networks and CozyDuke-infected systems to install MiniDuke onto a compromised network.</p> <p>https://www.symantec.com/connect/blogs/forkmeiamfamous-seaduke-latest-weapon-duke-armory</p>
	Aug 2015	<p>Attack on the Pentagon in the USA</p> <p>In August 2015 Cozy Bear was linked to a spear-phishing cyberattack against the Pentagon email system causing the entire Joint Staff unclassified email system and Internet access during the investigation.</p> <p>https://www.cnn.com/2015/08/06/russia-hacks-pentagon-computers-nbc-citing-sources.html</p>
	Jun 2016	<p>Breach of Democratic National Committee</p> <p>In June 2016, Cozy Bear was implicated alongside the hacker group Sofacy, APT 28, Fancy Bear, Sednit had few weeks. Cozy Bear's more sophisticated tradecraft and interest in traditional long-term espionage suggest originates from a separate Russian intelligence agency.</p> <p>https://www.crowdstrike.com/blog/bears-midst-intrusion-democratic-national-committee/</p>
	Aug 2016	<p>Attacks on US think tanks and NGOs</p> <p>After the United States presidential election, 2016, Cozy Bear was linked to a series of coordinated and well-phishing campaigns against U.S.-based think tanks and non-governmental organizations (NGOs).</p> <p>https://www.volexity.com/blog/2016/11/09/powerduke-post-election-spear-phishing-campaigns-targeting-think-tanks/</p>
	Jan 2017	<p>Attacks on the Norwegian Government</p> <p>On February 3, 2017, the Norwegian Police Security Service (PST) reported that attempts had been made to email accounts of nine individuals in the Ministry of Defense, Ministry of Foreign Affairs, and the Labour Party attributed to Cozy Bear, whose targets included the Norwegian Radiation Protection Authority, PST section c Haugstøyl, and an unnamed college.</p> <p>https://www.usatoday.com/story/news/2017/02/03/norway-russian-hackers-hit-spy-agency-defense-labour-j</p>

Feb 2017	<p>Attack on Dutch ministries</p> <p>In February 2017, the General Intelligence and Security Service (AIVD) of the Netherlands revealed that Far Bear had made several attempts to hack into Dutch ministries, including the Ministry of General Affairs, over months. Rob Bertholee, head of the AIVD, said on EenVandaag that the hackers were Russian and had tried to secret government documents.</p> <p><https://www.volkskrant.nl/cultuur-media/russen-faalden-bij-hackpogingen-ambtenaren-op-nederlandse-min></p>
