Starting in April this year, 360 Baize Lab intercepted a large number of attack samples from an unknown hacker organization. The hacker organization sent a phishing email to the victim by forging a police station investigation letter, COVID-19 detection notice, etc. , Through the backdoor virus to control the victim's machine, steal valuable sensitive data related to the target. The PDB path of the virus samples used by the organization points to a user named "Vendetta", and we will later also name the hacker organization Vendetta.
