You are here: [Home](#) / [Password Cracking Tools](#) / THC Hydra Download – Fast & Flexible Network Login Hacking Tool

THC Hydra Download below, this software rocks, it's pretty much the most up to date and currently developed password brute forcing tool around at the moment.

Number one problem with security and people getting hacked are passwords, as every password security study shows. Hydra is a parallelized login cracker which supports numerous protocols to attack. New modules are easy to add, besides that, it is flexible and very fast.

It supports a LOT of services and protocols too.

THC Hydra Hacking Tool Features

There are already several login hacker tools available, however, none does either support more than one protocol to attack or support parallelized connects.

Currently, this tool supports:

- TELNET
- FTP
- HTTP-GET
- HTTP-HEAD
- HTTPS-GET
- HTTP-HEAD
- HTTP-PROXY
- LDAP2
- LDAP3
- SMB
- SMBNT
- MS-SQL
- MYSQL
- POSTGRES
- REXEC
- SOCKS5
- VNC
- POP3
- IMAP
- NNTP
- PCNFS
- ICQ
- SAP/R3
- Cisco auth
- Cisco enable
- SMTP-AUTH
- SSH2
- SNMP
- CVS
- Cisco AAA

However, the module engine for new services is very easy so it won't take a long time until even more services are supported. Planned are: SSH v1, Oracle and more...

This tool is a proof of concept code, to give researchers and security consultants the possibility to show how easy it would be to gain unauthorized access from remote to a system.

Download THC Hydra

You can THC Hydra download is here:

[thc-hydra-8.6.zip](#)

How to install THC Hydra

Compile and install (./configure; make; make install)

If you want the THC Hydra windows hydra.exe version you can grab the Cygwin version from thc.org.
