Measurable impact from day one

2x

behavioural change at double the speed of standard awareness trainings

>50%

user engagement through gamification and interactive storytelling

<1 hour

to meet the requirements of key security compliance frameworks

70%

users demonstrate active reporting behaviours in the first six months

Science-backed learning that changes behaviour for good

We go beyond checkbox training to deliver real behaviour change – personalised, engaging, and proven to work:

Training that actually engages

We use gamification, microlearning, spaced repetition, interactive elements, nudging, and storytelling to make learning stick.

Simplifying where others complicate

We are laser-focused on simplifying, only delivering learning content based on individual risk profiles through our personalization engine.

Meeting your team where they are

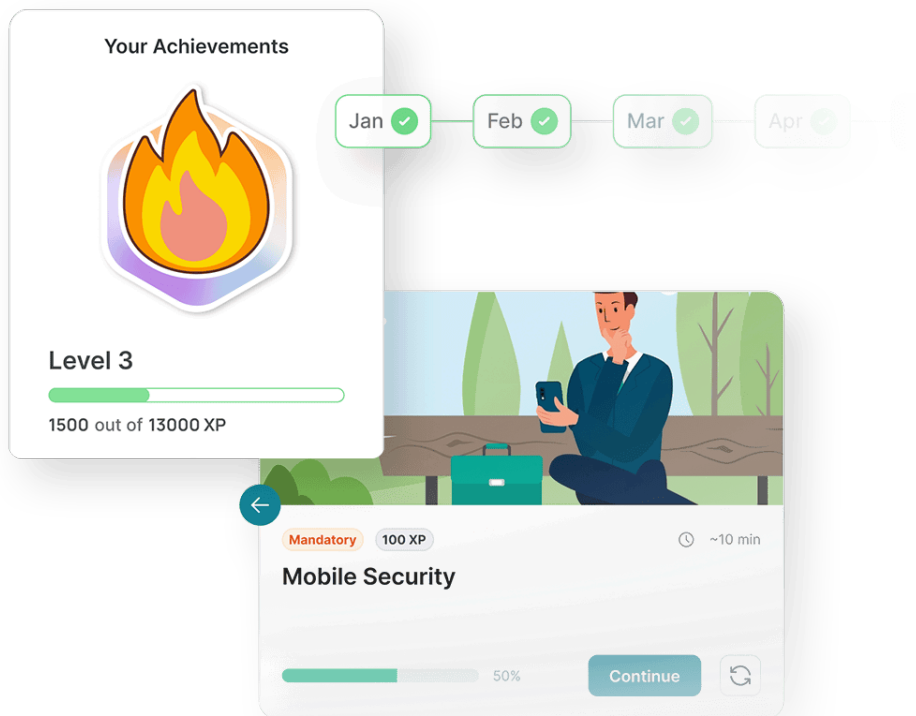

Our content is continuous, contextual, and multi-channel. We make it easy for employees to apply what they learn in real time.

Understanding behavior in full

By looking at behavior in its entirety – including cultural influences, motivational factors and attitudes, context, and emotional responses –, we address the full spectrum of human risk factors so you can prioritize interventions based on the highest risk.

Empower your people to protect your organisation.

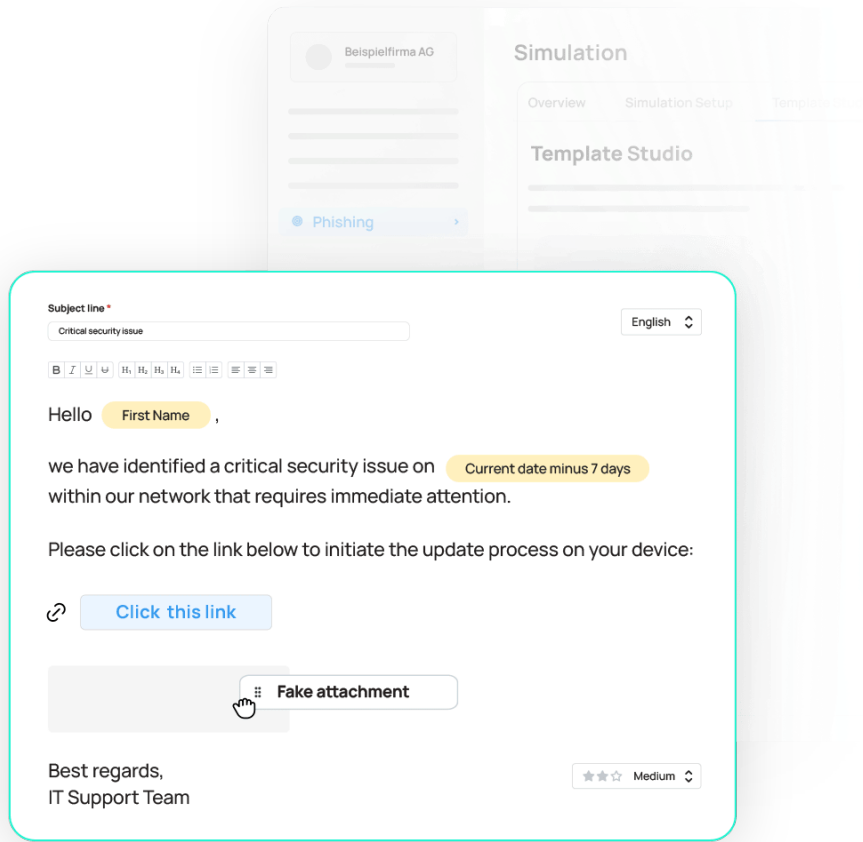

Our security awareness training, grounded in behavioural science, gives your team the skills to recognise threats, respond quickly, and stay secure.

Cybersecurity awareness training

Cybersecurity awareness training that provides relevant, engaging and interactive cyber security content for your team. Each learning moment builds stronger security habits.

Seamless integrations

We integrate with the best in the market to continually enhance our platform and provide a holistic view of security behaviour.

Big impact.

Minimal time investment.

SoSafe's scalability, ease of use, and ability to move the needle quickly on security awareness and risk reduction make it the catalyst for scaling a security culture.

2 days

to go-live: fast implementation with managed-service option

20 min

is all security leaders need to spend on our platform to strengthen their security culture

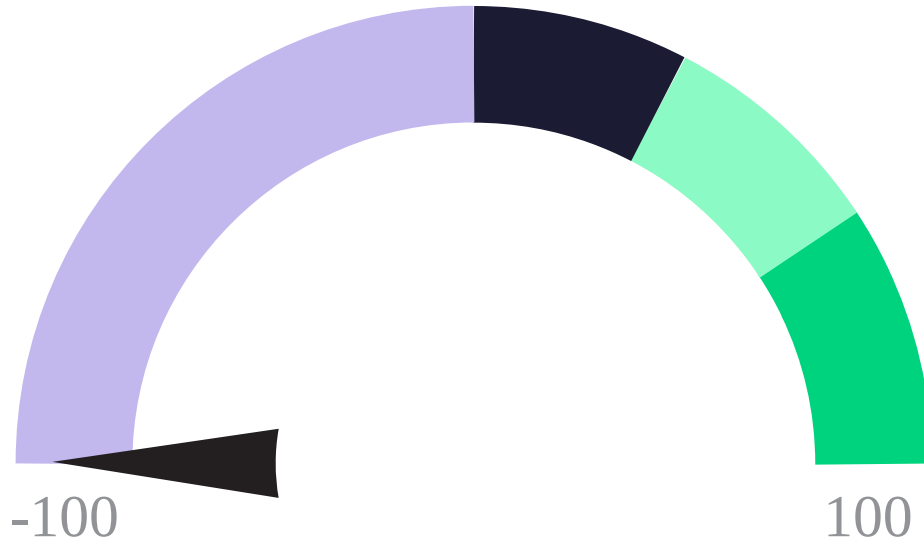

60%

less time spent per user to get security awareness training through personalization

4.7/5

end-user review: best-in-class engagement

Why choose SoSafe: go beyond compliance and reduce human risk

The Net Promotor Score (NPS) metrics ensure optimal customer loyalty assessment

“As an e-commerce company, we have to be particularly vigilant. The consequences for us would be dire if just one of our sales channels were disabled by an attack for a single day. With SoSafe, we can rest assured that the knowledge we gain stays with us in the long run because continuous training coupled with learning psychology is what ultimately helps the most.”

INDUSTRY RECOGNITION

Loved by customers and recognised by experts

Our innovative and privacy-focused solution will keep you two steps ahead of cyberthreats.
