## Tool: Invoke-SMBAutoBrute

Names	Invoke-SMBAutoBrute
Category	<a href="#">Tools</a>
Type	<a href="#">Credential stealer</a>
Description	One of my favorite post-ex metasploit modules is smb_login. It's great for running a quick test using credentials you've discovered. One of the problems with it is that there is nothing that prevents you from locking out accounts. Plus, you have to create user list which means dumping users   cut   sed   awk, blah blah blah.
Information	< <a href="https://www.shellintel.com/blog/2016/7/7/smart-smb-brute-forcing">https://www.shellintel.com/blog/2016/7/7/smart-smb-brute-forcing</a> > < <a href="https://github.com/ShellIntel/scripts/blob/master/Invoke-SMBAutoBrute.ps1">https://github.com/ShellIntel/scripts/blob/master/Invoke-SMBAutoBrute.ps1</a> >
