BITSAdmin is a command-line tool that you can use to create download or upload jobs and monitor their progress. For full, comprehensive documentation of the tool and all of its commands, see [bitsadmin](#) and [bitsadmin examples](#) in the Windows IT Pro Center.

For example, to list all BITS jobs, you can issue the command `bitsadmin /list /verbose` . Here's a screenshot of sample output for that command.

Sample output for the bitsadmin /list /verbose command
