Lockbit has fixed the deadline for the ransom payment on August 17, 2023.

If confirmed the incident could have a dramatic impact on the privacy of cancer patients. The company has yet to disclose the security incident.

This year other companies owned by Siemens suffered a security breach.

In April, Siemens Metaverse, a virtual space built to mirror real machines, factories, and other highly complex systems, [exposed sensitive data](#), including the company’s office plans and internet of things (IoT) devices.

In June, the [Clop ransomware](#) group added new victims of MOVEit attacks to its dark web leak site, including the industrial giants [Schneider Electric and Siemens Energy](#). Both Schneider Electric and Siemens Energy provide Industrial Control Systems (ICS) that are used in critical national infrastructure worldwide.
