92% Uptime SLA

Trusted by Industry Leaders

No Installation Required

Deploy in minutes, not months. Our cloud-native solution requires zero software installation on your end. Just configure and go — your team is protected immediately.

Simply Replace Three DNS Entries

Integration is as simple as updating three DNS records. Seamlessly integrates with your existing email infrastructure — no migration, no downtime, no disruption.

True End-to-End Encryption

Military-grade encryption with a zero-knowledge architecture. Only sender and recipient can read messages. Not even we can access your emails — true privacy guaranteed.

About Spixnet

Austria's Leading Email Security Experts

Spixnet GmbH is an Austrian IT security company with founded in 2022 with a clear mission — to make advanced cryptography accessible to every business — we've grown to protect hundreds of organizations across Austria and Europe.

Our zero-knowledge architecture means we never have access to your data. Every email is encrypted before it leaves your server, and only the intended recipient can decrypt it. We combine best-in-class technology with Austrian engineering precision and GDPR-compliant infrastructure.

 Spixnet Team – IT Security Experts

Since 2022

Trusted Austrian Security

Email Encryption

End-to-end encrypted email communication with S/MIME and PGP support. Protect every message from interception and unauthorized access.

Encrypted Storage

Zero-knowledge encrypted file and data storage. Store sensitive documents with confidence — only you hold the keys to your data.

DNS Management

Streamlined DNS configuration and management for email security protocols. SPF, DKIM, and DMARC setup handled by our experts.

Spam Protection

AI-powered spam filtering and phishing detection. Block threats before they reach your inbox with enterprise-grade protection.

Key Management

Centralized cryptographic key lifecycle management. Generate, distribute, rotate, and revoke keys across your organization with ease.

Security Monitoring

24/7 real-time monitoring and alerting. Get instant notifications of suspicious activity, with detailed audit logs for compliance.

Compliance reporting

[Contact sales](#)

★★★★★

"We evaluated several email encryption providers and Spixnet stood out immediately. Three DNS changes, zero downtime, and our entire team was onboarded in under an hour. The peace of mind is invaluable."

★★★★★

"As a healthcare organization, GDPR compliance is non-negotiable. Spixnet gave us true end-to-end encryption with Austrian data residency. The support team actually understands our regulatory requirements."

SB

Sandra B. Head of IT Security, Healthcare Group

★★★★★

"We've been with Spixnet for over three years. The platform is rock-solid, the uptime is exceptional, and every time we've had a question the response was fast and helpful. Exactly what enterprise security should look like."

MH

Markus H. Director of Networks, Retail Chain
