Tool: TinyNote

| | |
|-------------|--|
| Names | TinyNote |
| Category | Malware |
| Type | Backdoor |
| Description | (Checkea Point) The TinyNote backdoor is a first-stage malware only capable of basic machine enumeration and command execution via PowerShell or Goroutines. However, it focuses on redundancy to gain a foothold on the infected machine, including setting up multiple persistency tasks, communication with several different C&C servers, and different types of C&C command execution. |
