

Drive-by Compromise, Technique T1189 - Enterprise

Archived: 2026-04-05 16:01:15 UTC

[C0057 3CX Supply Chain Attack](#)

During the [3CX Supply Chain Attack](#), [AppleJeus](#) compromised the `www.tradingtechnologies[.]com` website hosting a hidden IFRAME to exploit visitors, two months before the site was known to deliver a compromised version of the X_TRADER software package.^[5]

[G0138 Andariel](#)

[Andariel](#) has used watering hole attacks, often with zero-day exploits, to gain initial access to victims within a specific IP range.^{[6][7]}

[G0073 APT19](#)

[APT19](#) performed a watering hole attack on forbes.com in 2014 to compromise targets.^[8]

[G0007 APT28](#)

[APT28](#) has compromised targets via strategic web compromise utilizing custom exploit kits.^[9] [APT28](#) used reflected cross-site scripting (XSS) against government websites to redirect users to phishing webpages.^[10]

[G0050 APT32](#)

[APT32](#) has infected victims by tricking them into visiting compromised watering hole websites.^{[11][12]}

[G0067 APT37](#)

[APT37](#) has used strategic web compromises, particularly of South Korean websites, to distribute malware. The group has also used torrent file-sharing sites to more indiscriminately disseminate malware to victims. As part of their compromises, the group has used a Javascript based profiler called RICECURRY to profile a victim's web browser and deliver malicious code accordingly.^{[13][14][15]}

[G0082 APT38](#)

[APT38](#) has conducted watering holes schemes to gain initial access to victims.^{[16][17]}

[G0001 Axiom](#)

[Axiom](#) has used watering hole attacks to gain access.^[18]

[S0606 Bad Rabbit](#)

[Bad Rabbit](#) spread through watering holes on popular sites by injecting JavaScript into the HTML body or a `.js` file. [\[19\]](#)[\[20\]](#)

[G0060 BRONZE BUTLER](#)

[BRONZE BUTLER](#) compromised three Japanese websites using a Flash exploit to perform watering hole attacks. [\[21\]](#)

[S0482 Bundlore](#)

[Bundlore](#) has been spread through malicious advertisements on websites. [\[22\]](#)

[C0010 C0010](#)

During [C0010](#), UNC3890 actors likely established a watering hole that was hosted on a login page of a legitimate Israeli shipping company that was active until at least November 2021. [\[23\]](#)

[G1012 CURIUM](#)

[CURIUM](#) has used strategic website compromise to infect victims with malware such as [IMAPLoader](#). [\[24\]](#)

[G1034 Daggerfly](#)

[Daggerfly](#) has used strategic website compromise for initial access against victims. [\[25\]](#)

[G0070 Dark Caracal](#)

[Dark Caracal](#) leveraged a watering hole to serve up malicious code. [\[26\]](#)

[G0012 Darkhotel](#)

[Darkhotel](#) used embedded iframes on hotel login portals to redirect selected victims to download malware. [\[27\]](#)

[G0035 Dragonfly](#)

[Dragonfly](#) has compromised targets via strategic web compromise (SWC) utilizing a custom exploit kit. [\[28\]](#)[\[29\]](#)[\[30\]](#)

[G1006 Earth Lusca](#)

[Earth Lusca](#) has performed watering hole attacks. [\[31\]](#)

[G0066 Elderwood](#)

[Elderwood](#) has delivered zero-day exploits and malware to victims by injecting malicious code into specific public Web pages visited by targets within a particular sector. [\[32\]](#)[\[33\]](#)[\[34\]](#)

[S0531 Grandoreiro](#)

[Grandoreiro](#) has used compromised websites and Google Ads to bait victims into downloading its installer. [\[35\]](#)[\[36\]](#)

[S0483 IcedID](#)

[IcedID](#) has cloned legitimate websites/applications to distribute the malware. [\[37\]](#)

[S0215 KARAE](#)

[KARAE](#) was distributed through torrent file-sharing websites to South Korean victims, using a YouTube video downloader application as a lure. [\[14\]](#)

[G0032 Lazarus Group](#)

[Lazarus Group](#) delivered [RATANKBA](#) and other malicious code to victims via a compromised legitimate website. [\[38\]](#)[\[39\]](#)

[G0077 Leafminer](#)

[Leafminer](#) has infected victims using watering holes. [\[40\]](#)

[G0065 Leviathan](#)

[Leviathan](#) has infected victims using watering holes. [\[41\]](#)

[S0451 LoudMiner](#)

[LoudMiner](#) is typically bundled with pirated copies of Virtual Studio Technology (VST) for Windows and macOS. [\[42\]](#)

[G0095 Machete](#)

[Machete](#) has distributed [Machete](#) through a fake blog website. [\[43\]](#)

[G0059 Magic Hound](#)

[Magic Hound](#) has conducted watering-hole attacks through media and magazine websites. [\[44\]](#)

[G1020 Mustard Tempest](#)

[Mustard Tempest](#) has used drive-by downloads for initial infection, often using fake browser updates as a lure. [\[45\]](#)
[\[46\]](#)[\[47\]](#)[\[48\]](#)

[C0016 Operation Dust Storm](#)

During [Operation Dust Storm](#), the threat actors used a watering hole attack on a popular software reseller to exploit the then-zero-day Internet Explorer vulnerability CVE-2014-0322. [\[49\]](#)

[G0040 Patchwork](#)

[Patchwork](#) has used watering holes to deliver files with exploits to initial victims. [\[50\]](#)[\[51\]](#)

[G0068 PLATINUM](#)

[PLATINUM](#) has sometimes used drive-by attacks against vulnerable browser plugins. [\[52\]](#)

[S0216 POORAIM](#)

[POORAIM](#) has been delivered through compromised sites acting as watering holes. [\[14\]](#)

[G0056 PROMETHIUM](#)

[PROMETHIUM](#) has used watering hole attacks to deliver malicious versions of legitimate installers. [\[53\]](#)

[S0496 REvil](#)

[REvil](#) has infected victim machines through compromised websites and exploit kits. [\[54\]\[55\]\[56\]\[57\]](#)

[G0048 RTM](#)

[RTM](#) has distributed its malware via the RIG and SUNDOWN exploit kits, as well as online advertising network Yandex.Direct. [\[58\]\[59\]](#)

[S1086 Snip3](#)

[Snip3](#) has been delivered to targets via downloads from malicious domains. [\[60\]](#)

[S1124 SocGholish](#)

[SocGholish](#) has been distributed through compromised websites with malicious content often masquerading as browser updates. [\[45\]](#)

[G0027 Threat Group-3390](#)

[Threat Group-3390](#) has extensively used strategic web compromises to target victims. [\[61\]\[62\]](#)

[G0134 Transparent Tribe](#)

[Transparent Tribe](#) has used websites with malicious hyperlinks and iframes to infect targeted victims with [Crimson](#), [njRAT](#), and other malicious tools. [\[63\]\[64\]\[65\]](#)

[G0010 Turla](#)

[Turla](#) has infected victims using watering holes. [\[66\]\[67\]](#)

[G0124 Windigo](#)

[Windigo](#) has distributed Windows malware via drive-by downloads. [\[68\]](#)

[G0112 Windshift](#)

[Windshift](#) has used compromised websites to register custom URL schemes on a remote system. [\[69\]](#)

[G1035 Winter Vivern](#)

[Winter Vivern](#) created dedicated web pages mimicking legitimate government websites to deliver malicious fake anti-virus software. [\[70\]](#)
