Tool: SunBird

Names	SunBird
Category	Malware
Type	Reconnaissance , Backdoor , Info stealer , Exfiltration
Description	(Lookout) Hornbill and SunBird have both similarities and differences in the way they operate on an infected device. While SunBird features remote access trojan (RAT) functionality – a malware that can execute commands on an infected device as directed by an attacker – Hornbill is a discreet surveillance tool used to extract a selected set of data of interest to its operator.
