Tool: Numando

Names	Numando
Category	Malware
Type	Banking trojan , Reconnaissance , Backdoor , Keylogger , Info stealer , Credential stealer
Description	(ESET) The threat actor behind this malware family has been active since at least 2018. Even though it is not nearly as lively as Mekotio or Grandoreiro , it has been consistently used since we started tracking it, bringing interesting new techniques to the pool of Latin American banking trojans' tricks, like using seemingly useless ZIP archives or bundling payloads with decoy BMP images. Geographically, it focuses almost exclusively on Brazil with rare campaigns in Mexico and Spain.
