

What's new in Android security (M and N Version) - Google I/O 2016

Published: 2016-05-19 · Archived: 2026-04-05 13:16:53 UTC

Come learn about the protections we've put into Android M and N to make it our most secure version of Android yet. From verification of the boot process, to hardening of the runtime components, to more protections for your data while in transit, we're helping you to protect your users at every layer of the platform and into your applications. As developers, learn about how t ...
